

QUALITY POLICY

The purpose of Aniling is to enable genetic analysis to make a significant contribution to precision medicine, specifically by accelerating the field of epigenomics.

The Aniling Management expresses its commitment to the quality management system and encourages staff to participate and get involved.

Aniling ensures the quality of its products and services by implementing a Quality System in accordance with UNE-EN-ISO 13485, Directive 98/79/CE, and according to IVDR Regulation UE 2017/746 by the end of 2022.

The defined Quality Policy is focused on enhancing the following actions:

- To know the needs and expectations of our customers to ensure the supply of adequate, safe, reliable, compliant products and services. Therefore, to comply with our customers requirements
- To comply with applicable legal and regulatory requirements
- To establish and maintain process management, which will monitor their conformity and measure their effectiveness
- To seek excellence and continuous improvement, by identifying opportunities for improvement, both management and quality assurance, guiding efforts as well as controlling and correcting non-conformities, to prevent their causes, with an optimization perspective as the goal
- To maintain the right conditions in the different areas of work of the company to ensure the safety of our staff, as well as respect for the environment
- To have safe and service-friendly materials and personnel to ensure excellence in the quality of the products manufactured

We are convinced that the establishment, review and achievement of the proposed objectives and indicators will benefit everyone and direct us to better development of the company.

To achieve this, the General Management will provide the necessary resources and means for this purpose.

In Badalona, 2nd September 2020

Llorenç Coll
Chief Executive Officer
Aniling SL
